PROFESSIONAL SUMMARY

AI/ML Engineer with 3+ years of experience building and deploying machine learning solutions using Python, scikit-learn, PyTorch, TensorFlow, and SQL. Strong background in supervised and unsupervised learning, natural language processing (NLP), deep learning, feature engineering, model evaluation, and production ML pipelines. Experienced in developing classification, regression, clustering, and NLP systems and deploying APIs with FastAPI and Docker.

TECHNICAL SKILLS

Programming	Python, SQL, Bash
Machine Learning	scikit-learn, supervised learning, unsupervised learning, classification, regression, clustering, feature engineering
Deep Learning	PyTorch, TensorFlow, Keras, neural networks, CNNs, RNNs, Transformers
NLP	NLP pipelines, text classification, embeddings, TF-IDF, tokenization, sentiment analysis
Data	Pandas, NumPy, Matplotlib, data preprocessing, exploratory data analysis, statistics
MLOps / Deployment	FastAPI, Docker, REST APIs, ML pipelines, model serving, Git/GitHub
Databases & Cloud	PostgreSQL, MySQL, AWS, basic CI/CD

PROFESSIONAL EXPERIENCE

Machine Learning Engineer — Nova Analytics | Islamabad, Pakistan | 2023–Present

- Developed end-to-end machine learning pipelines in Python using Pandas, NumPy, and scikit-learn for customer and operational prediction tasks.
- Built classification and regression models including Logistic Regression, Random Forest, Gradient Boosting, and XGBoost; improved model performance through feature engineering and hyperparameter tuning.
- Designed NLP workflows for document and text classification using TF-IDF, embeddings, preprocessing, and transformer-based models.
- Developed deep learning models with PyTorch and TensorFlow/Keras, including neural networks, CNNs, and RNNs.
- Evaluated models using cross-validation, precision, recall, F1-score, ROC-AUC, MAE, and RMSE; performed error analysis and model comparison.
- Deployed trained models as REST APIs using FastAPI and Docker and collaborated with software engineers to integrate ML services into applications.

Junior Data Scientist — Insight Labs | Rawalpindi, Pakistan | 2022–2023

- Cleaned and analyzed structured and unstructured datasets using Python, Pandas, and SQL.
- Implemented K-Means, DBSCAN, and hierarchical clustering for customer segmentation and anomaly exploration.
- Created reproducible preprocessing and model-training pipelines and documented experiments using Git.
- Built dashboards and visualizations to communicate model results and data patterns to technical and non-technical stakeholders.

SELECTED PROJECTS

AI Resume Screening System

Built an NLP-based resume screening system that extracts skills, education, experience, and job requirements from resumes and job descriptions. Used semantic similarity, weighted skill matching, and ML-based scoring to rank candidates.

Customer Churn Prediction

Developed a supervised classification pipeline with feature engineering, cross-validation, hyperparameter tuning, and F1/ROC-AUC evaluation. Deployed the final model through a FastAPI service.

NLP Document Classification

Created a text classification system using TF-IDF and transformer embeddings, comparing traditional machine learning models with a neural network approach.

EDUCATION

Bachelor of Science in Computer Science — Air University, Islamabad | 2018–2022

Relevant coursework: Machine Learning, Artificial Intelligence, Deep Learning, Data Mining, Statistics, Databases, Natural Language Processing.

CERTIFICATIONS

Machine Learning Specialization — Coursera | Deep Learning Specialization — Coursera

ADDITIONAL INFORMATION

Languages: English, Urdu | Availability: Full-time | Git/GitHub workflow and collaborative Agile development
