Education

Bachelors in Data Science
Air University

2024–2028

Personal Projects

- **Space Shooter Game**
A space shooter game developed using the FPSL library in C/C++ applying OOP concepts.
- **Arduino Based Heart Beat and SpO2 Monitoring System**
An Arduino-powered device that measures and displays heart rate and blood oxygen (SpO2) levels in real time.
- **Marble Factory Management System**
A software solution that manages marble production, inventory, orders, sales, and employee records.
- **Airline Ticket Reservation System**
A data structures based system managing flight schedules, seat bookings, passenger records and reservations.
- **Crime Rate Analysis Based on US Data**
A data science project analyzing crime patterns, trends and factors influencing crime rates.
- **Bank Management**
An Assembly Language project that performs banking operations such as account creation, deposits, withdrawals and balance inquiry.
- **Flood Severity Prediction**
A machine learning system that predicts flood severity using environmental and weather-related data.
- **Analysis of Consumer Trust in Reviews**
A statistical study examining how customer reviews influence consumer trust and purchasing decisions.
- **Web Based Movie Recommendation System**
A website-based movie recommendation system implemented using HTML, CSS and JavaScript.

Certifications

1. **Supervised Machine Learning** – DeepLearning.AI Stanford University (Coursera) – Covered supervised learning concepts, including regression and classification.
2. **Introduction to SQL** – DataCamp – Covered SQL fundamentals for querying and managing relational databases.
3. **Intermediate SQL** – DataCamp – Covered intermediate SQL concepts, including joins, sub-queries, CTEs, and window functions.

Technical Skills and Interests

Languages: C/C++, Python, HTML, CSS

Libraries: C++ STL, Python Libraries

Web Dev Tools: Google Colab, VS Code, Git, GitHub, MySQL

Relevant Coursework: Data Structures & Algorithms, Introduction to AI, Introduction to Data Science, Object Oriented Programming, Database Management Systems, Applied Statistics

Soft Skills: Problem Solving, Self-Learning, Presentation, Adaptability

Hobbies and Interests

- Learning new programming technologies
- Problem solving and logical challenges
- Participating in team projects
