DATA SCIENCE INTERN

SUMMARY

I am a 2nd-year BS Data Science student currently building my understanding of programming and data-related concepts. I am learning Python, SQL, and C++ through coursework and personal practice, and I'm especially interested in working with data and understanding how it can be used to solve real problems. I am still at a beginner stage, but I am consistent with learning and improving my skills step by step.

EDUCATION

Air University - Data Science 2024 - 2028
2nd-year BS Data Science student with a CGPA of 3.13.

FSc Pre-Engineering (Physics, Chemistry, Mathematics) - Scientia Vision College 2022 - 2024
Completed with Grade A-1.

Matriculation (Science - Computer Studies) - Fazaia Inter College Islamabad 2020 - 2022
Completed with Grade A-1.

PROJECTS

PBS DataFest 2025 - Economic Trends Analysis

- Analyzed datasets to study economic trends in Pakistan.
- Created visualizations for GDP and employment data.
- Gained experience in data cleaning and data interpretation.

Data-Driven Insights into Lollywood (IMDb Dataset)

- Analyzed IMDb dataset using Python (Pandas, Matplotlib)
- Built a basic linear regression model to predict movie ratings
- Created visualizations to understand trends in the film industry

Marble Factory Management System (WinForms, SQL)

- Developed a desktop application to manage factory operations.
- Designed a database using SQL for storing records.
- Implemented features for inventory, orders, and data management.
- Built a user-friendly interface using Windows Forms.
